

AGRÈS

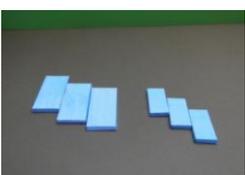

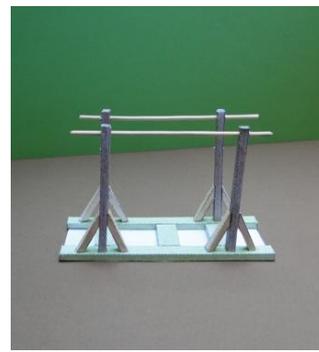

Nous vous proposons de réaliser des maquettes des différents agrès avec lesquels vous pourrez simuler des mises en place de différents ateliers.

Vous pourrez les disposer, par exemple, sur un carton plume de 65cmx50cm.

La réalisation des barres fixes, asymétriques et celle des anneaux comporte des difficultés. Des brochettes en bois ont été utilisées pour construire les barres.

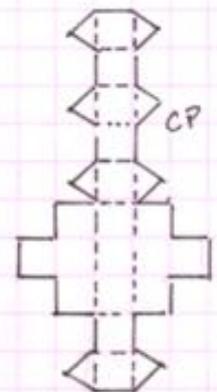

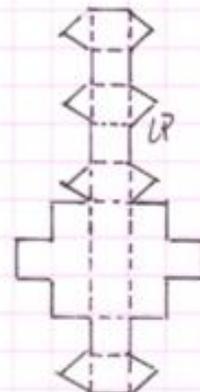

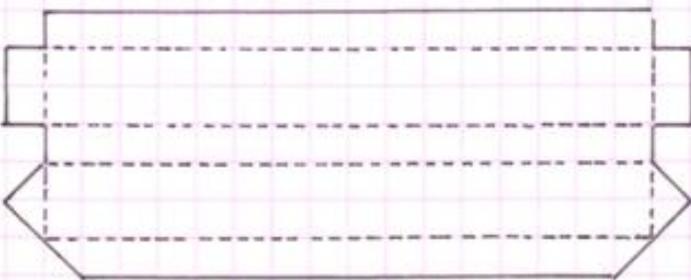

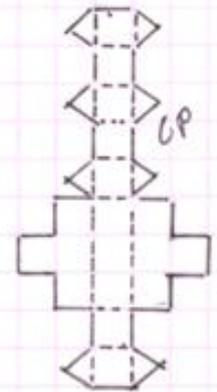

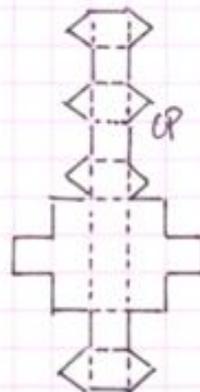

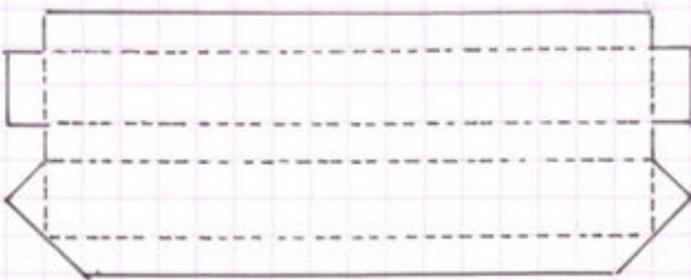

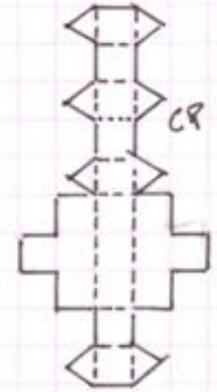

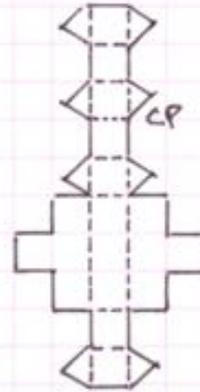

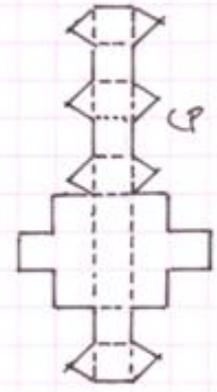

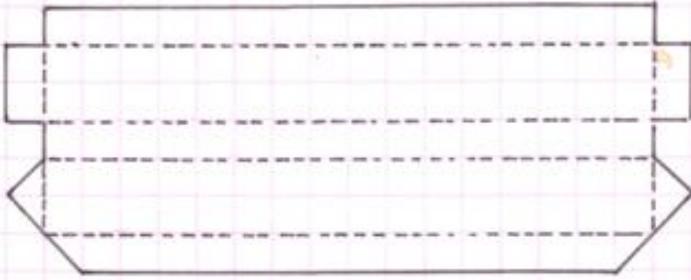

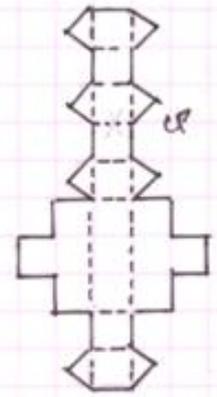

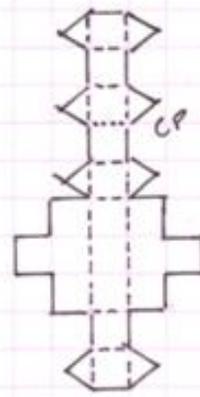

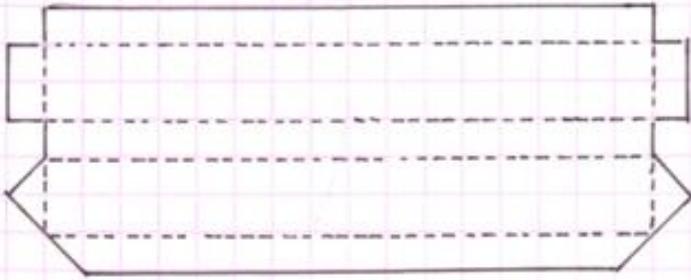

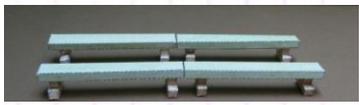

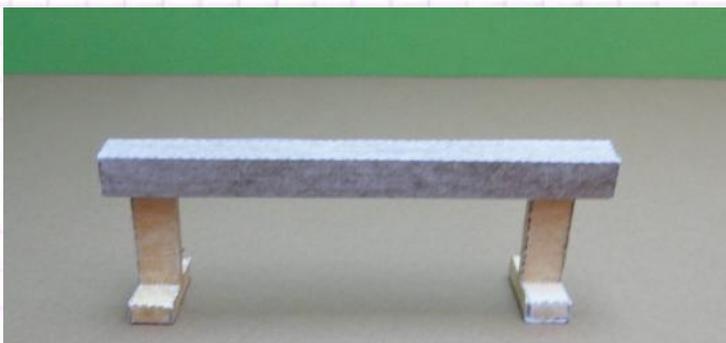

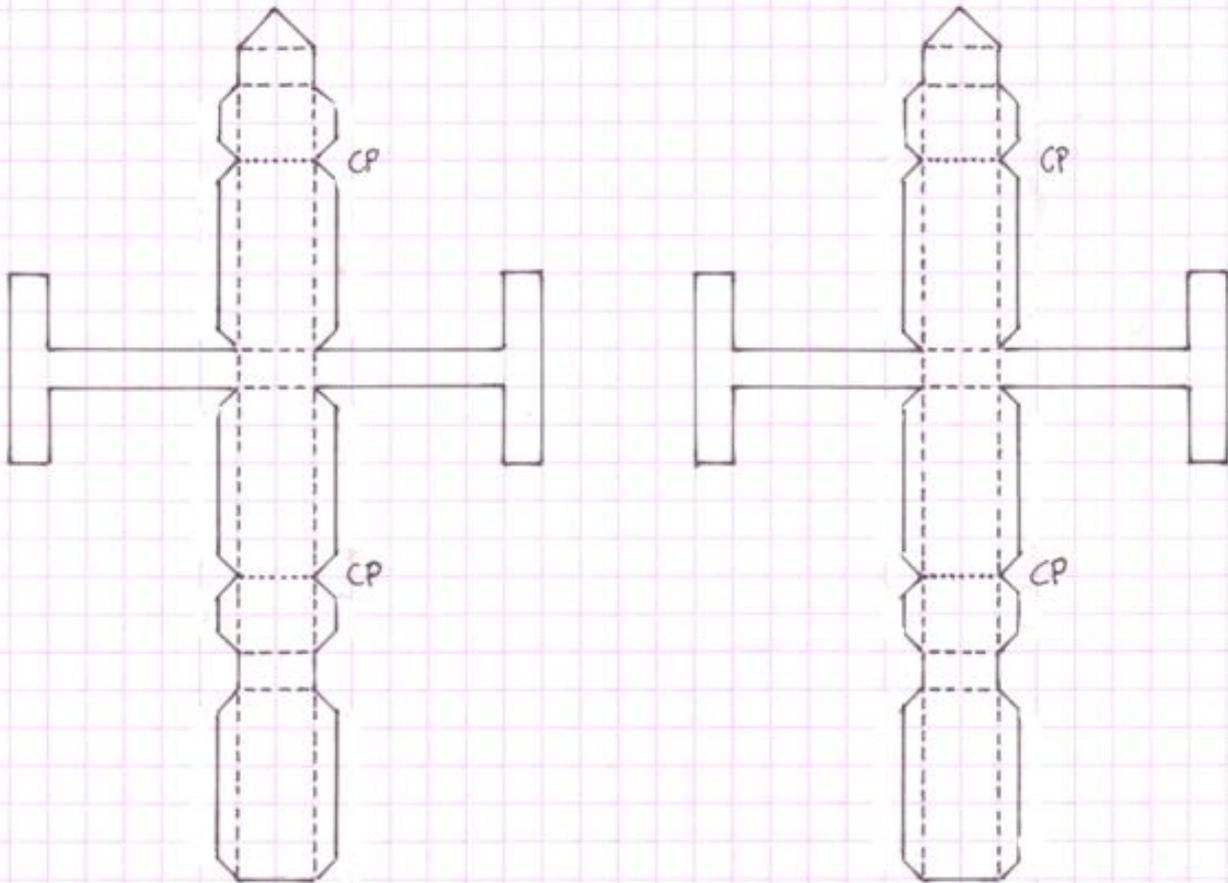

Petits bancs, poutre, cheval d'arçon, anneaux,

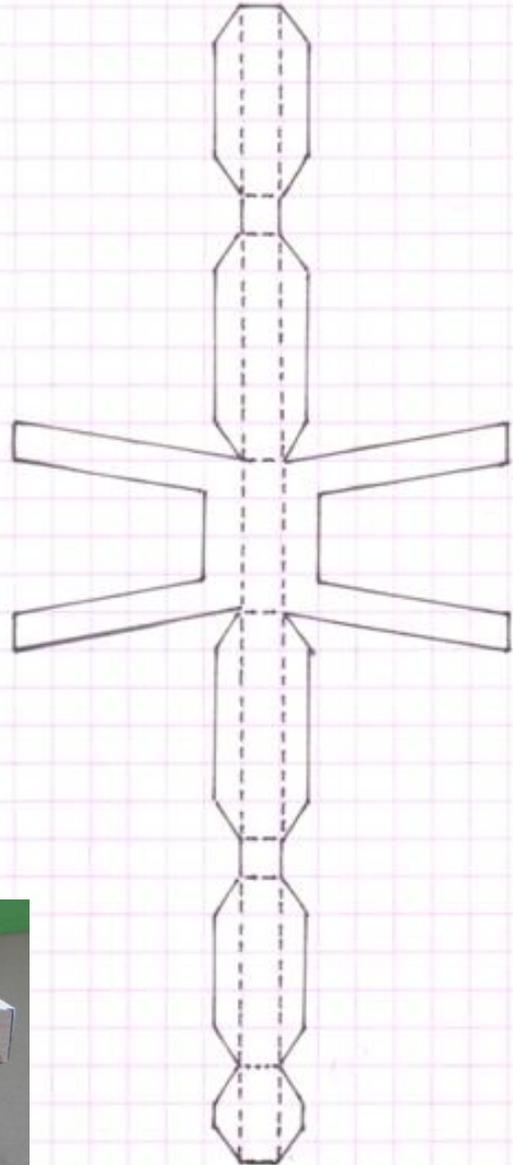

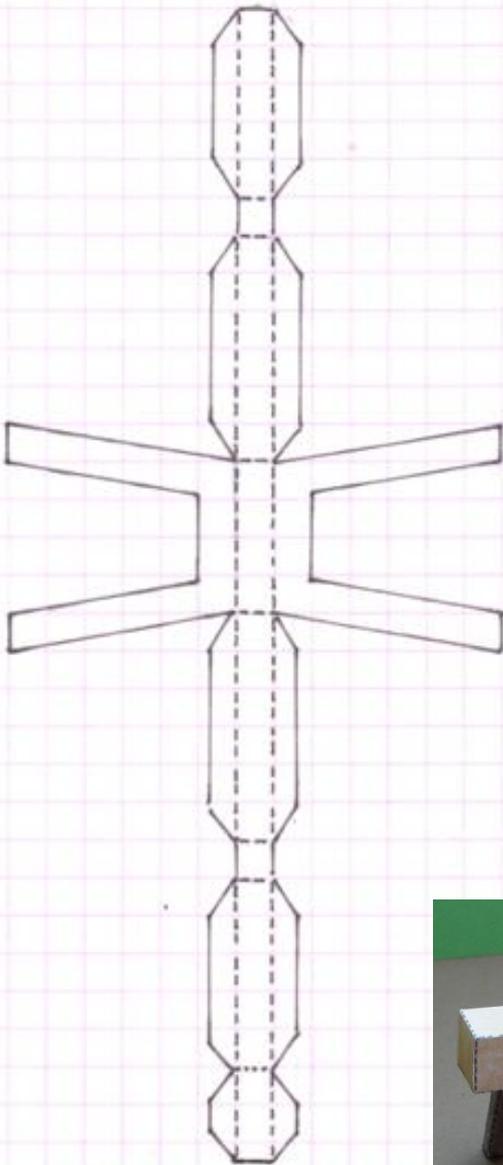

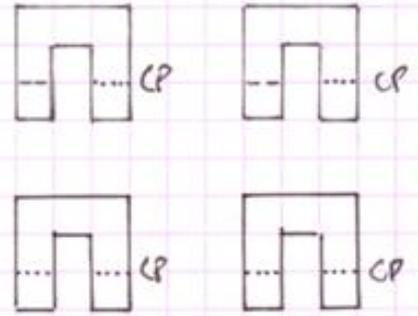

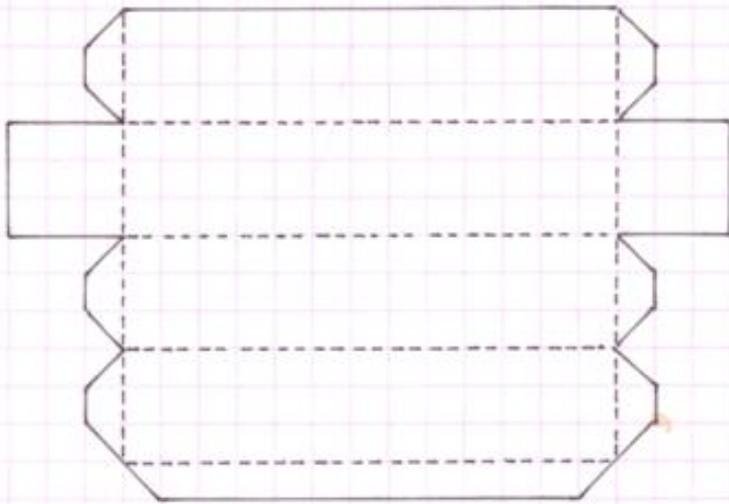

Mouton, plinth (éléments superposables), barre fixe, barres parallèles, barres asymétriques, tapis....

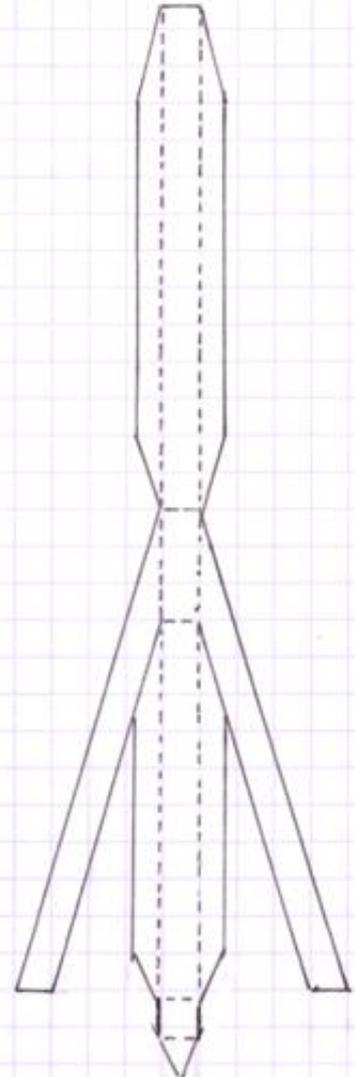

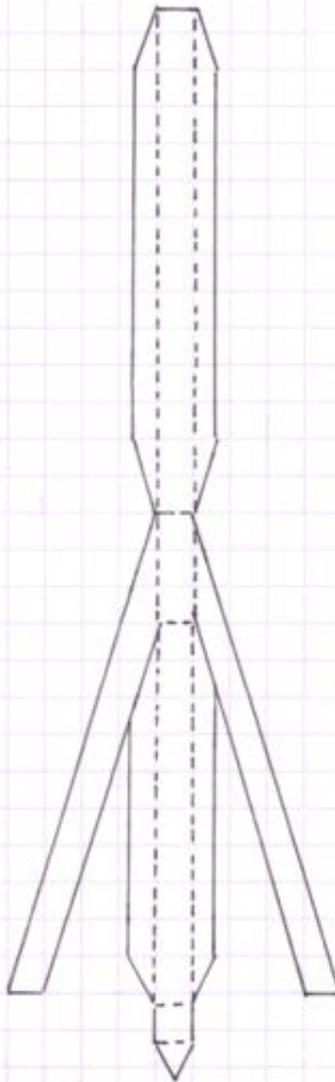

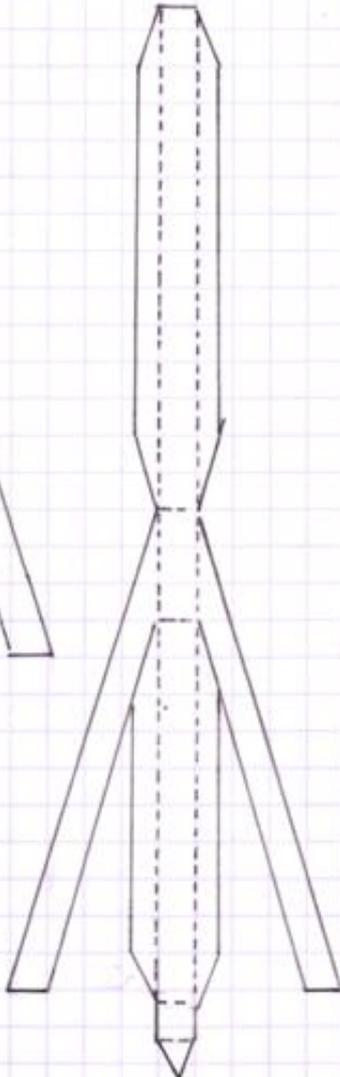

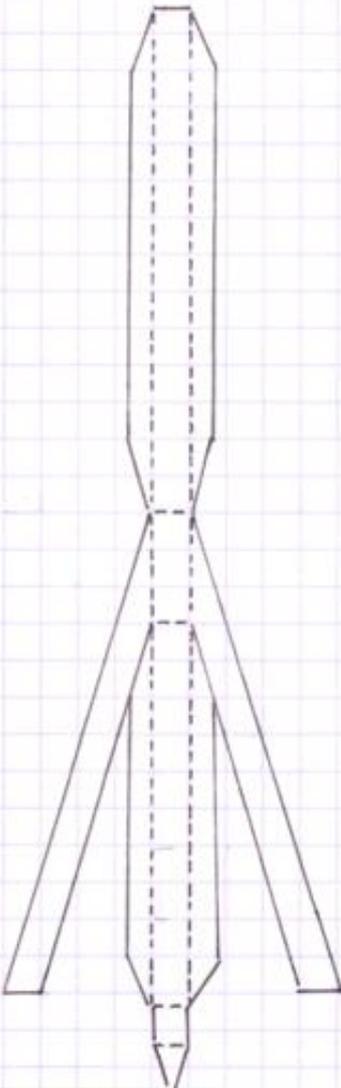

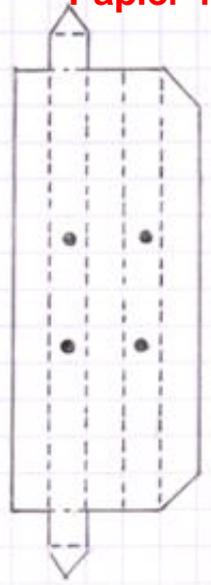

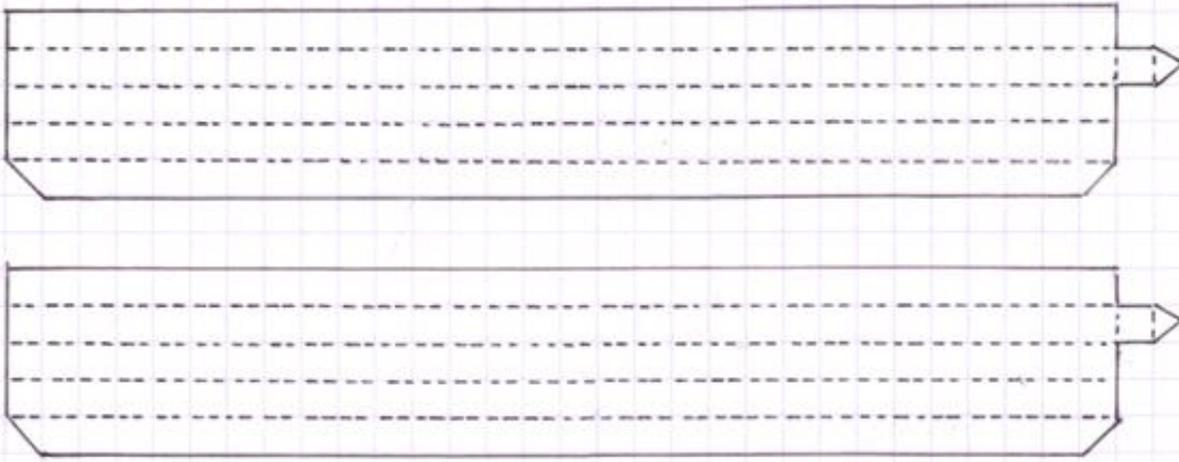

[Voir développements pages suivantes....](#)

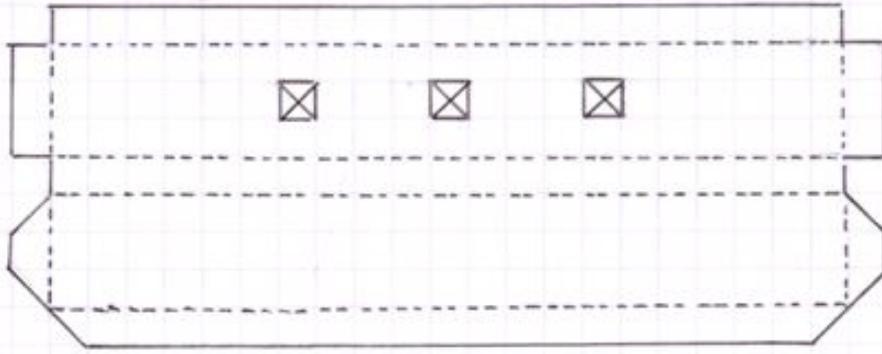

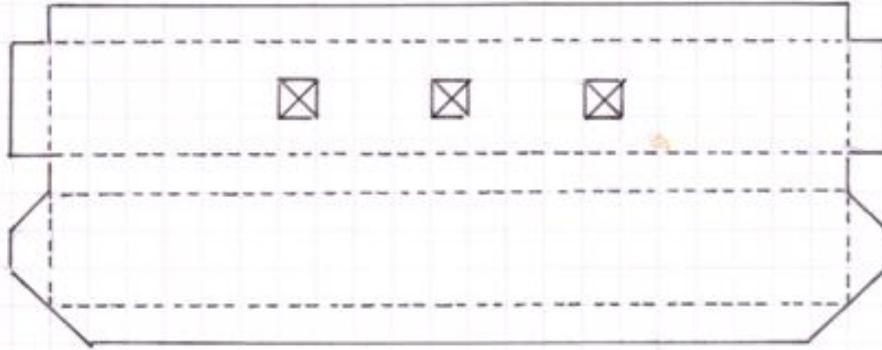

ANNEAUX : percer avant de plier, passer les fils avant de coller
