

LA FERME VOSGIENNE ET SA RECONVERSION

Cette ferme de forme carrée a été édifée sur les hauteurs du village de Moussey (88), il y a 250 ans environ.

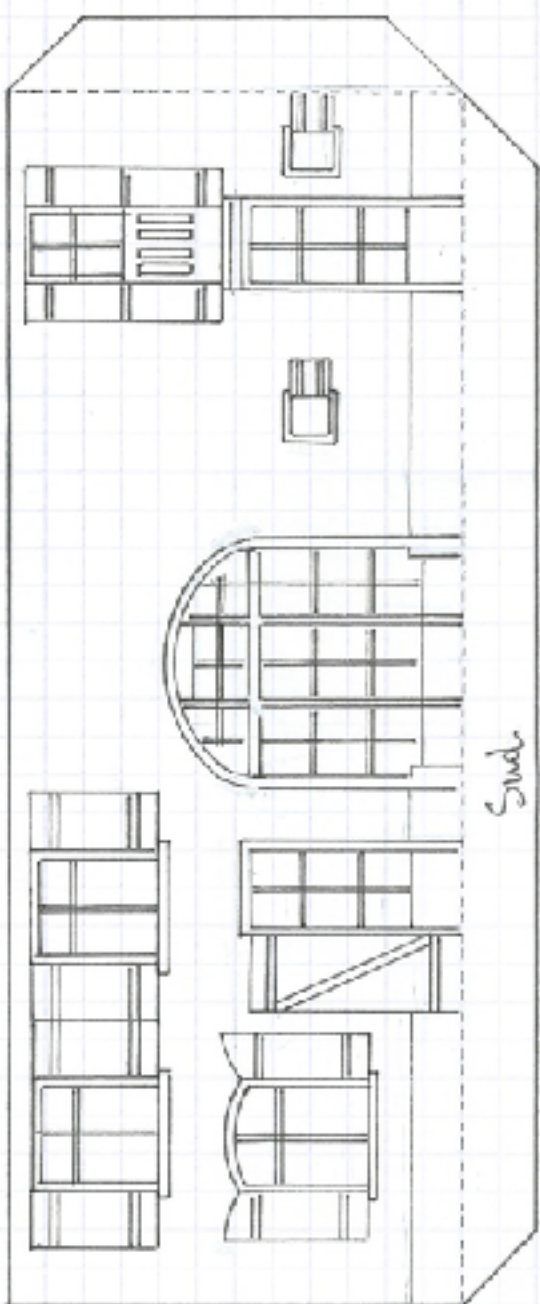

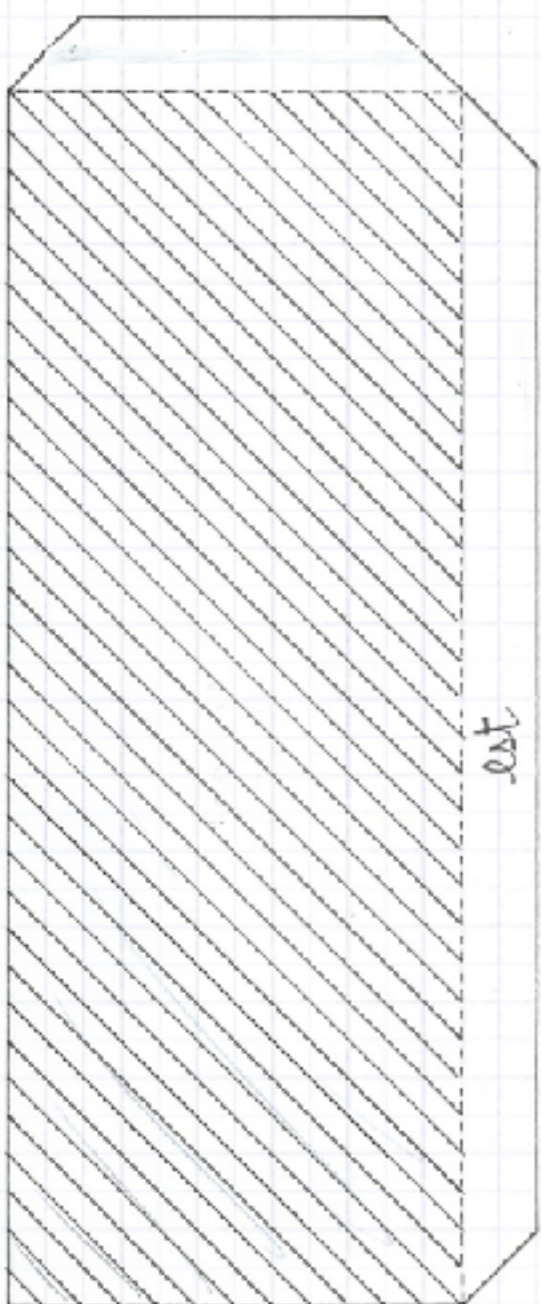

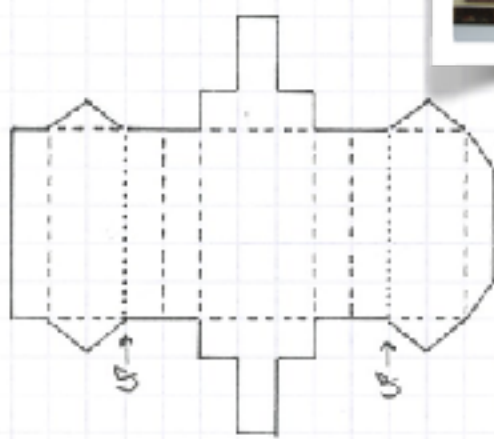

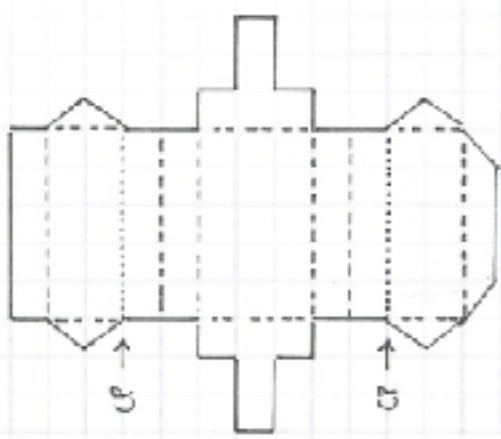

À cette époque, Moussey, comme la plupart des villages des vallées vosgiennes, abritaient des usines de tissage et des filatures. De nombreux ouvriers exploitaient en parallèle ces petites fermes, en y élevant quelques animaux, cultivant jardins et vergers, complétant ainsi leur faible salaire ouvrier.

Nous vous proposons 2 développements de la façade Sud : son aspect actuel comme résidence principale et son aspect originel comme fermette.
