

CONSEILS DE MISE EN SCÈNE

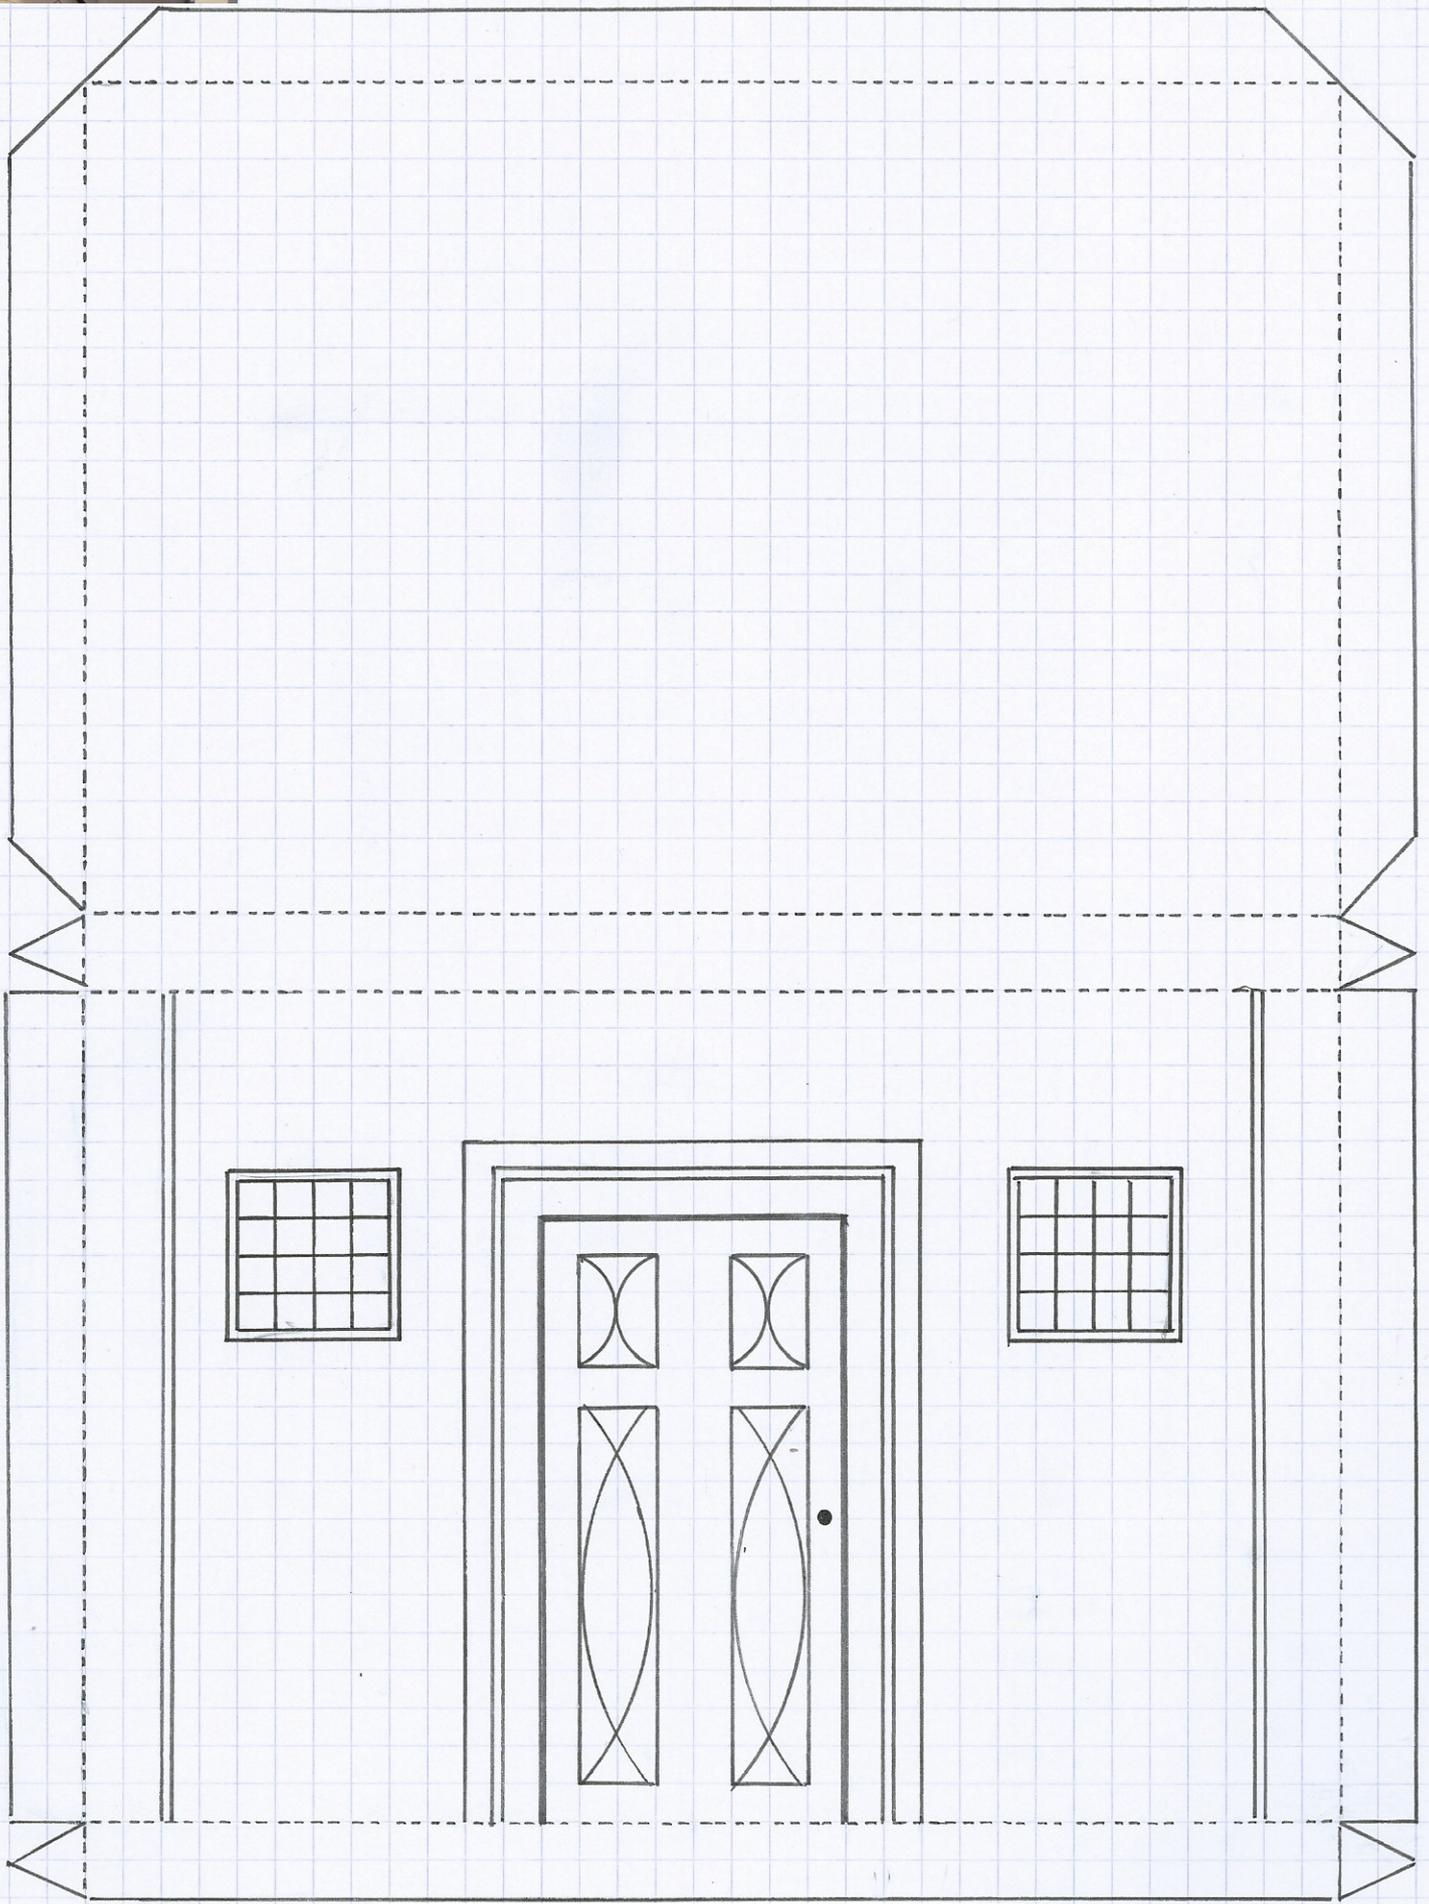

Afin de faciliter l'installation du mobilier et sa manipulation, nous avons conçu des murs intérieurs et extérieurs en carton plume. Les murs extérieurs sont amovibles, ce qui facilitera la modification ultérieure de l'agencement des pièces !

Les bandes de murs sont découpés dans des plaques de carton plume (60 cm x 50 cm x 3 cm). Nous suggérons de positionner en premier les murs intérieurs et extérieurs fixes. Les murs amovibles portent les fenêtres et les ouvertures vers l'extérieur (à coller sur chaque face du carton).

Pour réaliser un mur qui reste perpendiculaire au sol, il faut préparer des bandes de papier (80 gr) de 4 cm de large qui, pliées en deux, seront collées à la base du mur. Avant le collage de ces bandes, pensez à évider les portes et le passage entre les pièces !

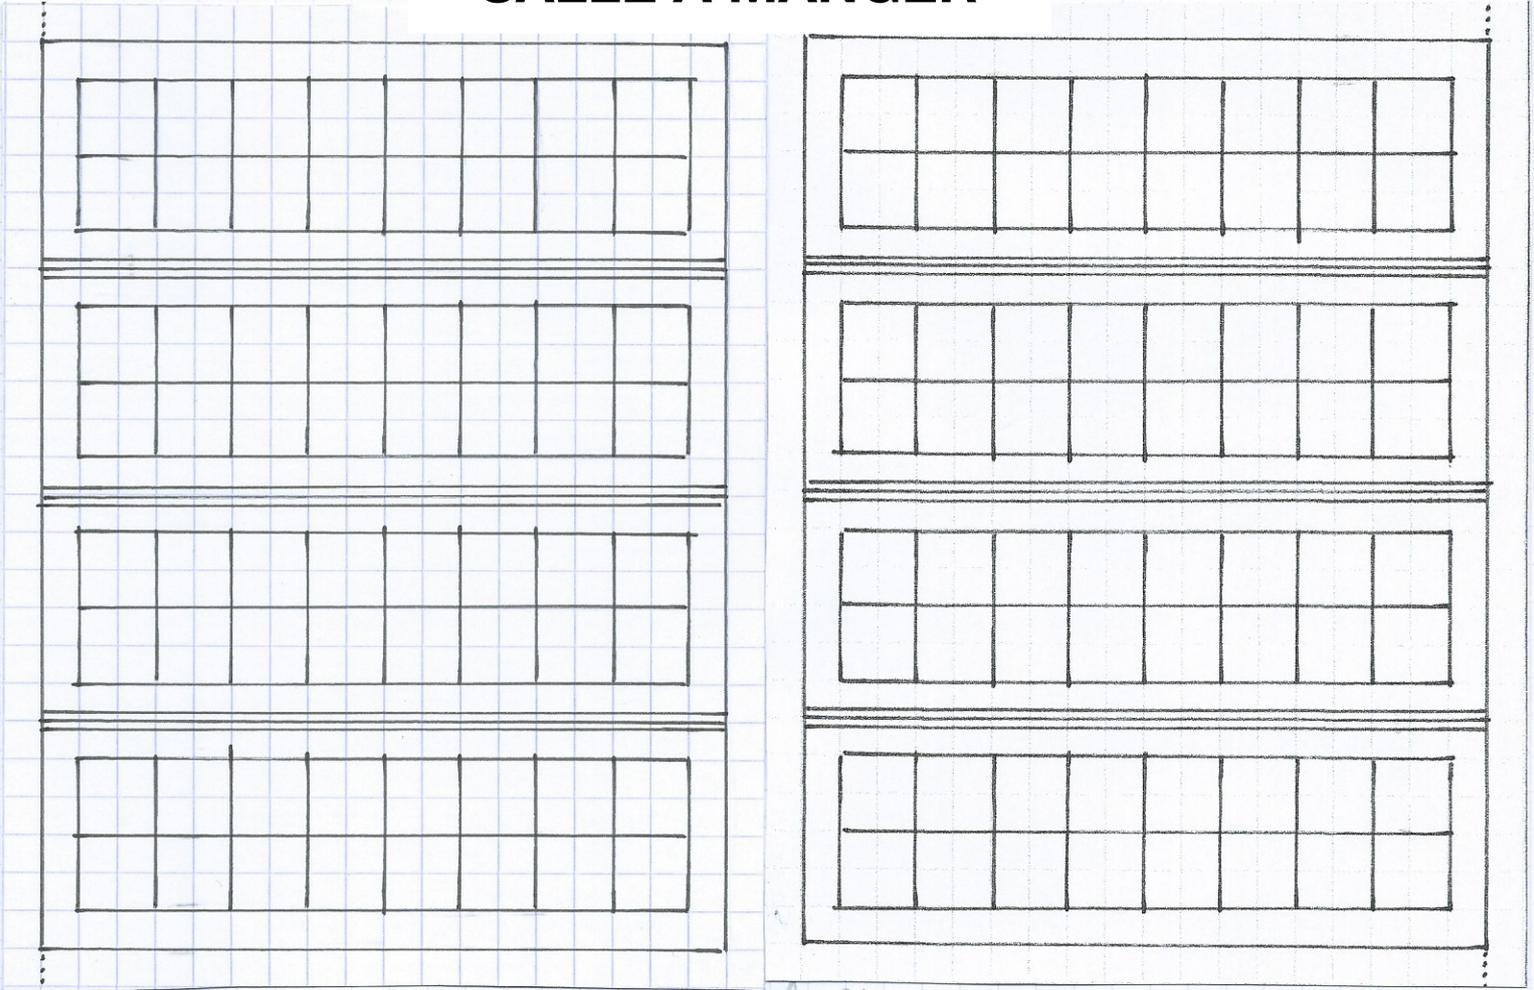

Pensez aussi à la décoration des murs et de portes. Celle-ci masquera les bandes de soutien en papier.
