

# LES OISEAUX

**Il existe une classification des oiseaux qui permettrait de les regrouper :**

Les passereaux : geai, mésange bleue, martin pêcheur

Les échassiers : flamant rose, héron cendré

Les palmipèdes : cormoran, cygne, goéland

Les rapaces : hibou, vautour

Les gallinacés : coq, paon, grand tétaras

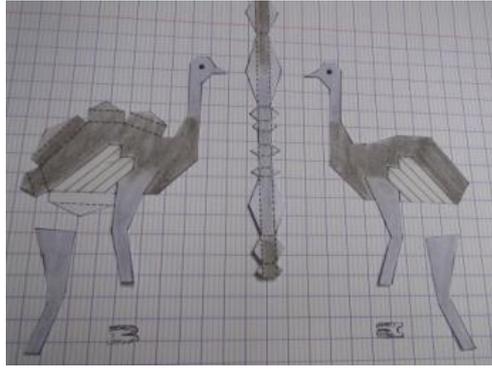

Les ratites : l'autruche ... **à vous de compléter ces séries.**

Ils peuvent être identifiés en remarquant les plumages, les cous, les becs, les pattes...

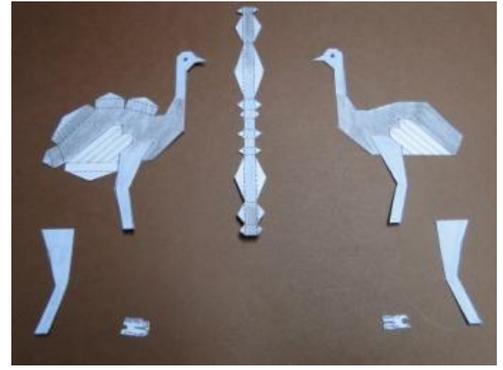

**Nos oiseaux sont présentés sans tenir compte d'une échelle.**

**Pages suivantes, vous trouverez 15 développements à imprimer sur papier 160 g. Vous devrez les colorier, marquer leurs plis, les découper, plier, coller. La préparation des pattes et l'installation sur un socle présentent des difficultés, nous vous en proposons le déroulé suivant :**

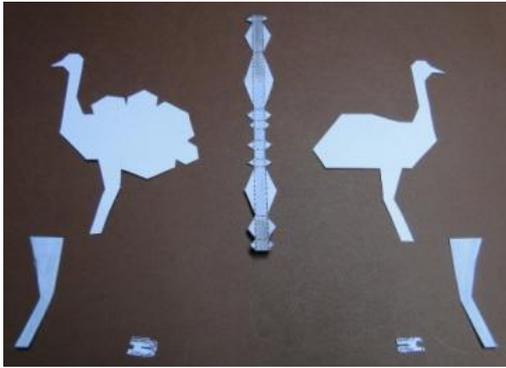

## COMMENT PROCÉDER

1. colorier

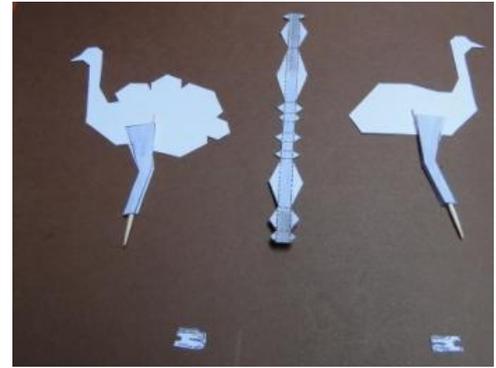

2. découper, poser

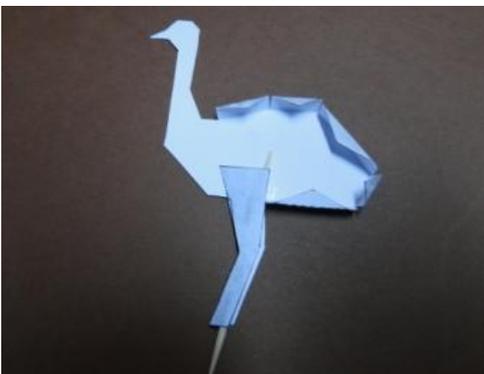

3. retourner les corps

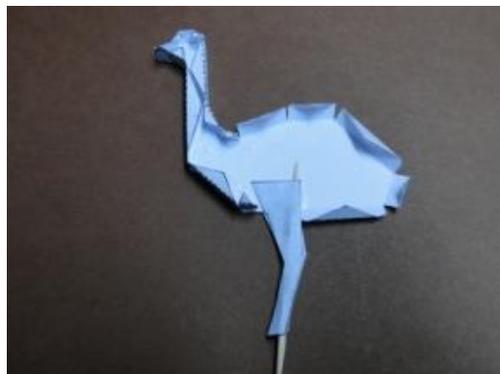

4. coller les cure-dents sur les pattes

5. coller la deuxième partie des pattes

6. marquer les plis et contreplis

7. coller la bande centrale

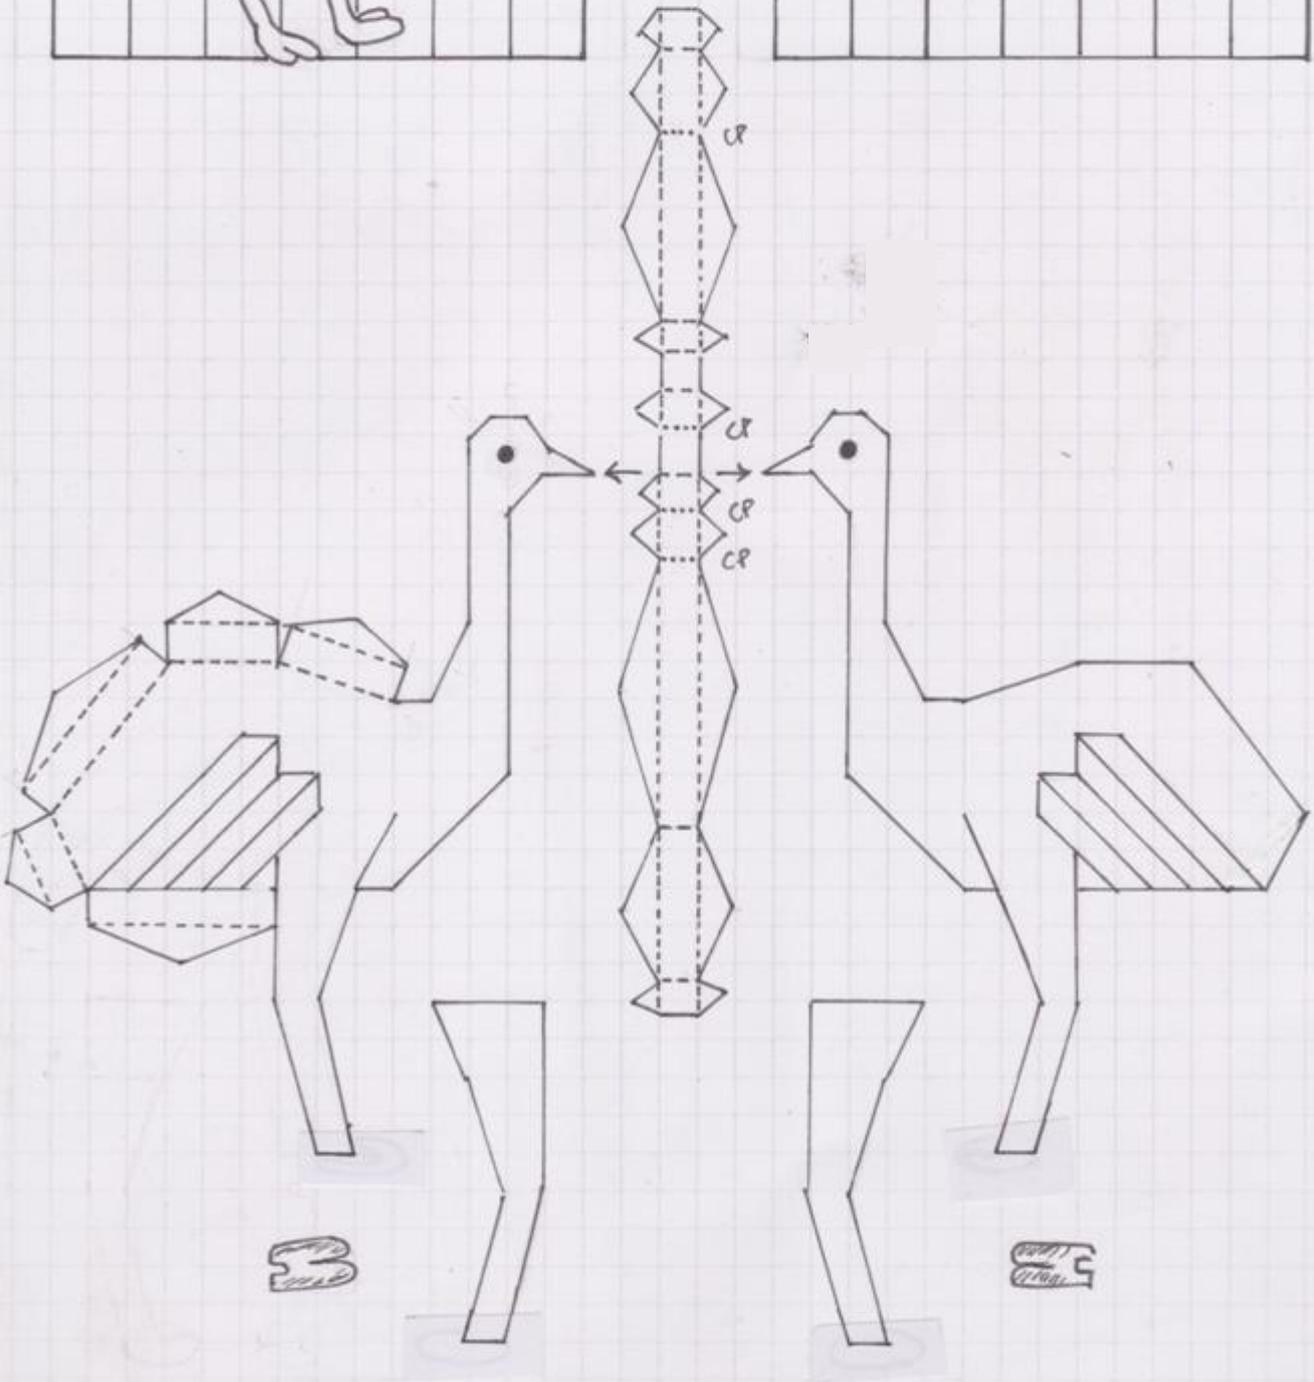

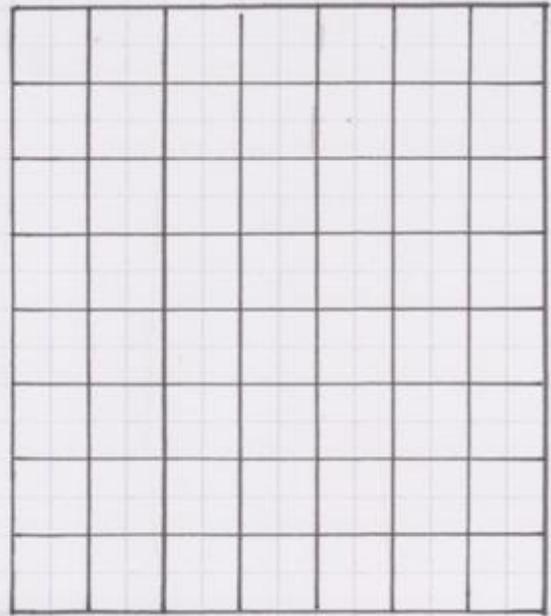

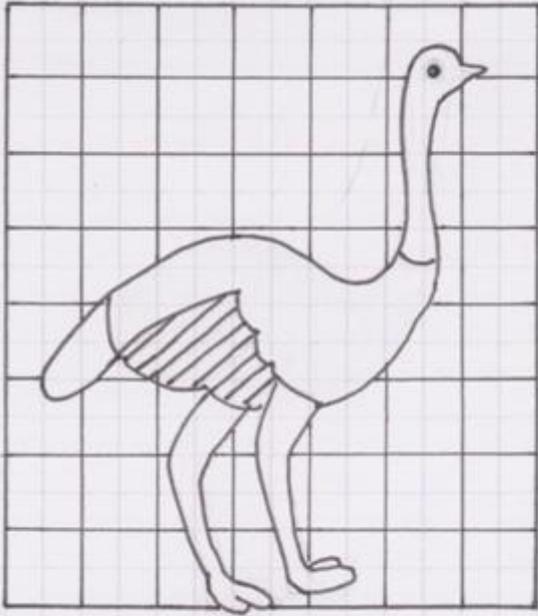

8. coller la deuxième partie du corps

CP = contre-plis à marquer

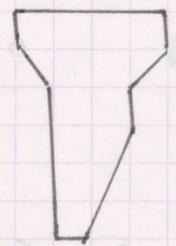

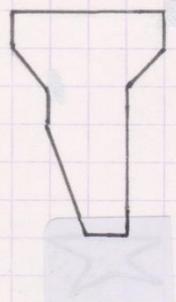

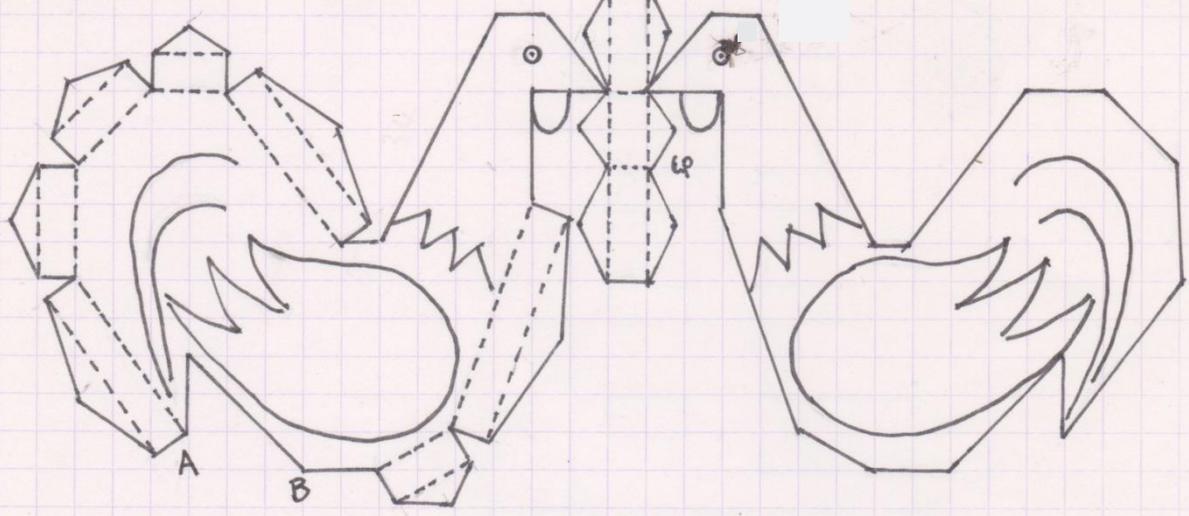

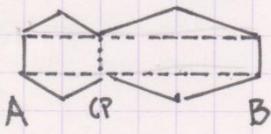

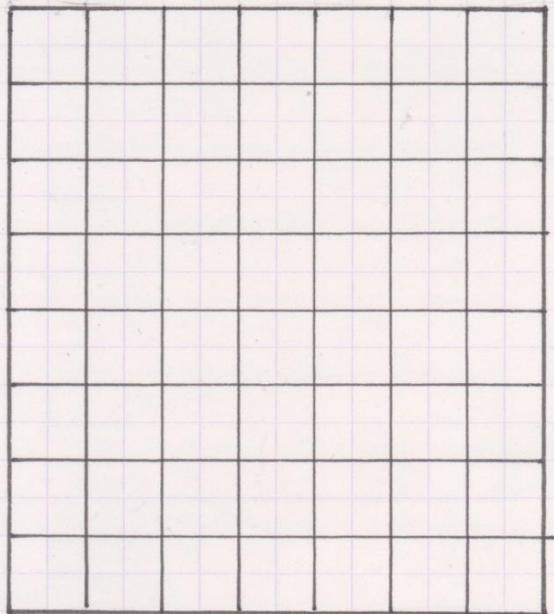

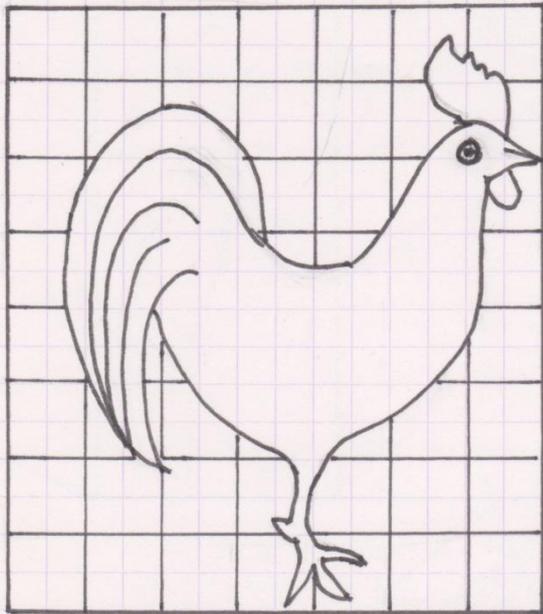

# AUTRUCHE

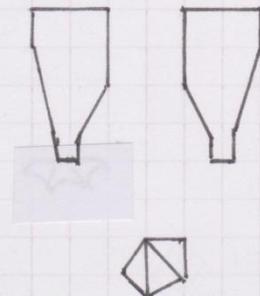

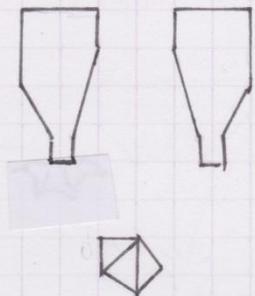

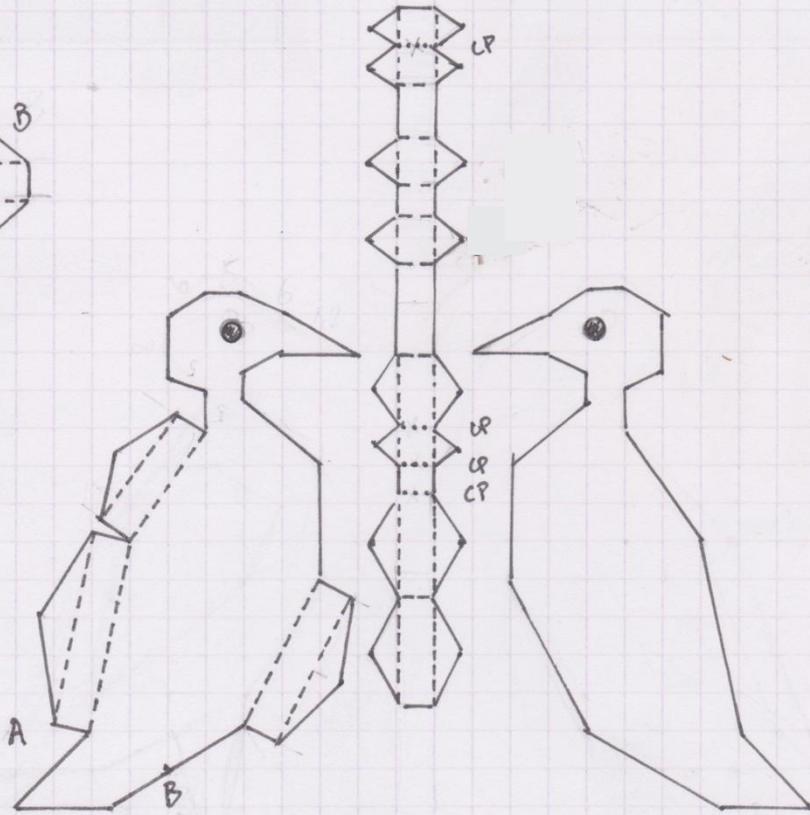

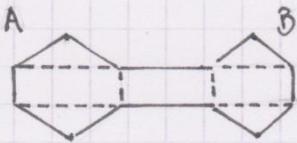

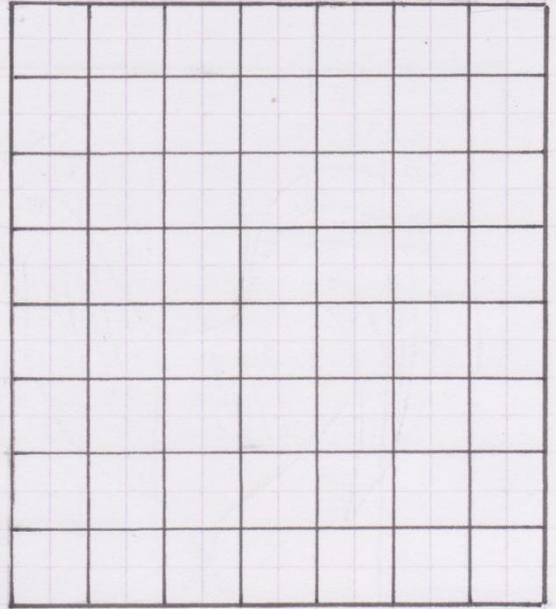

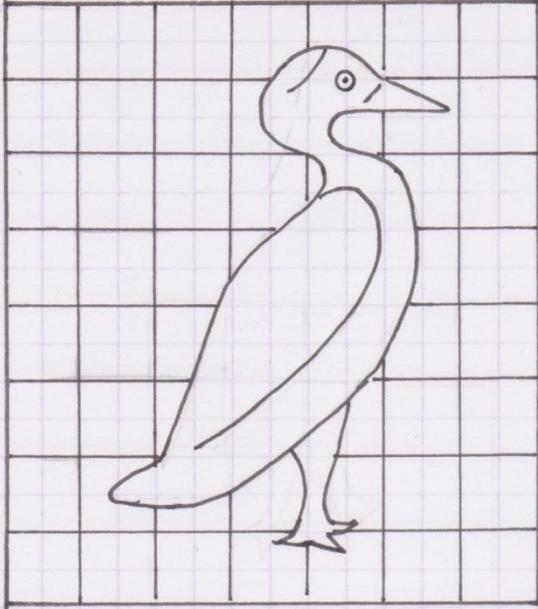

# COQ

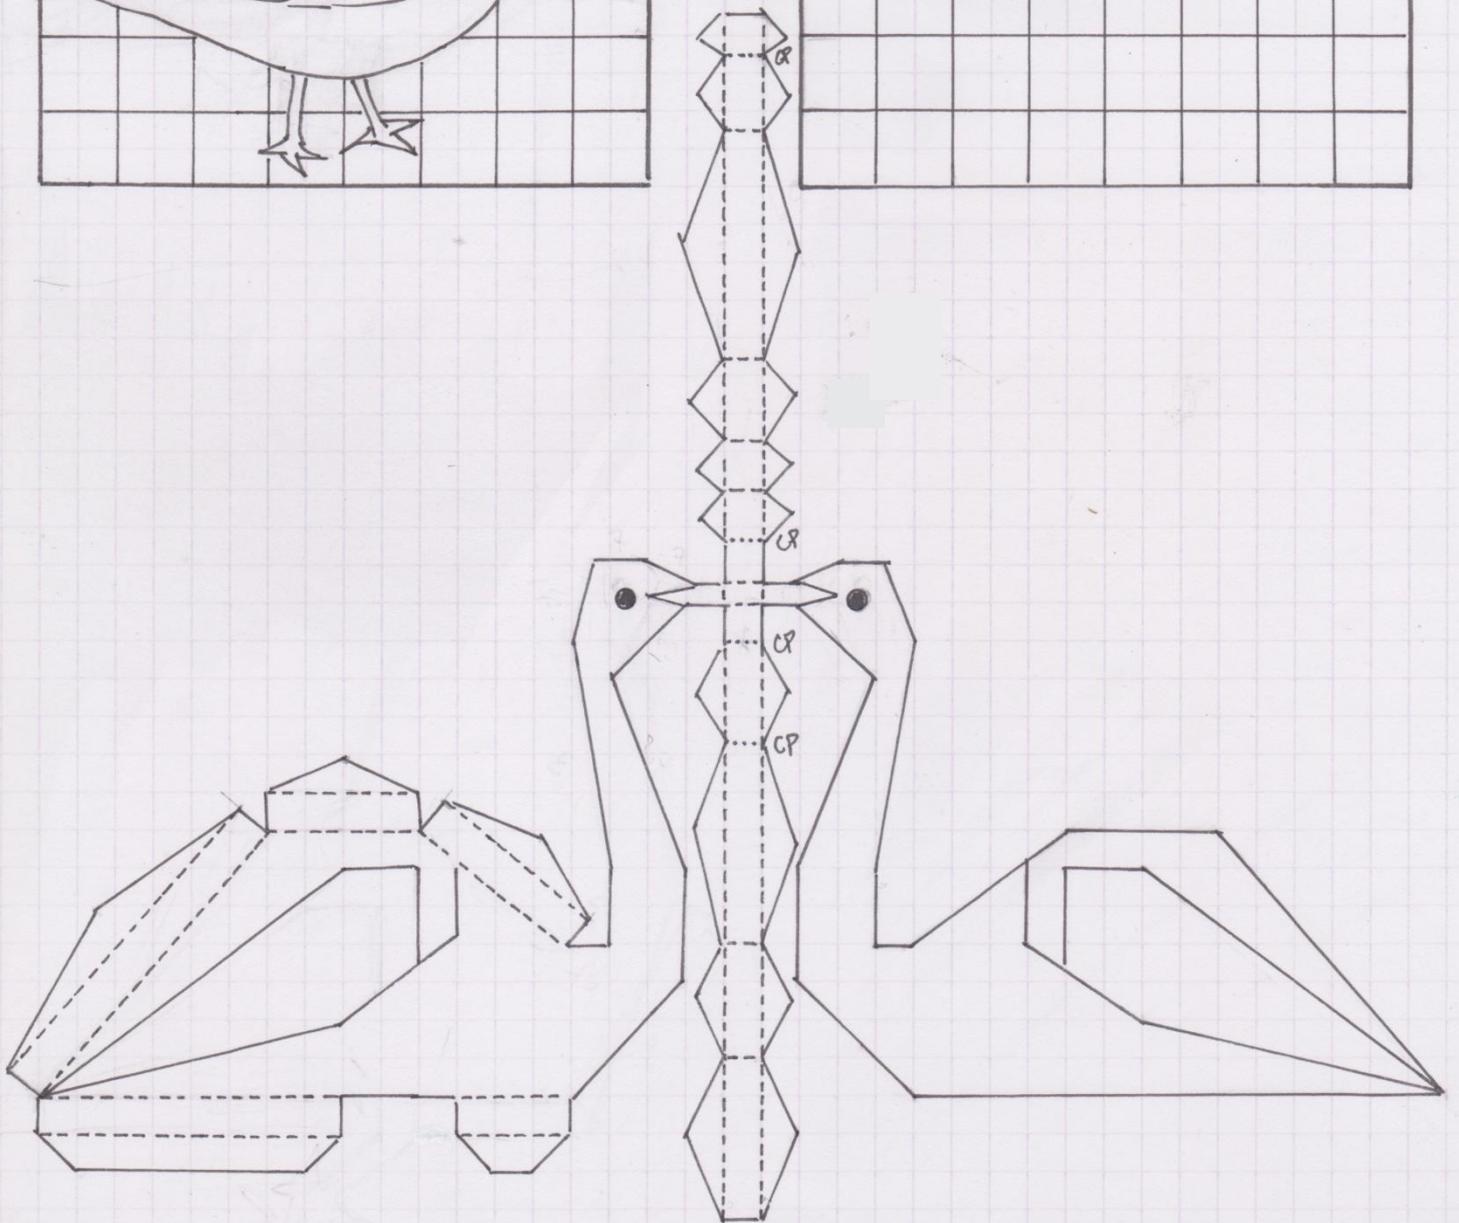

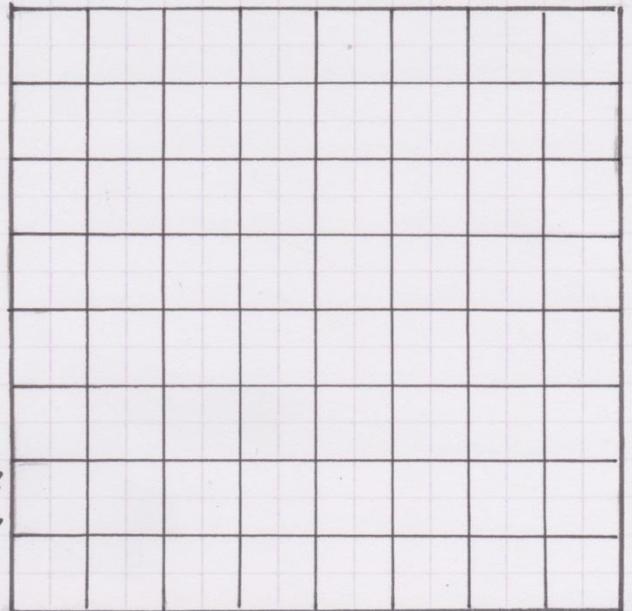

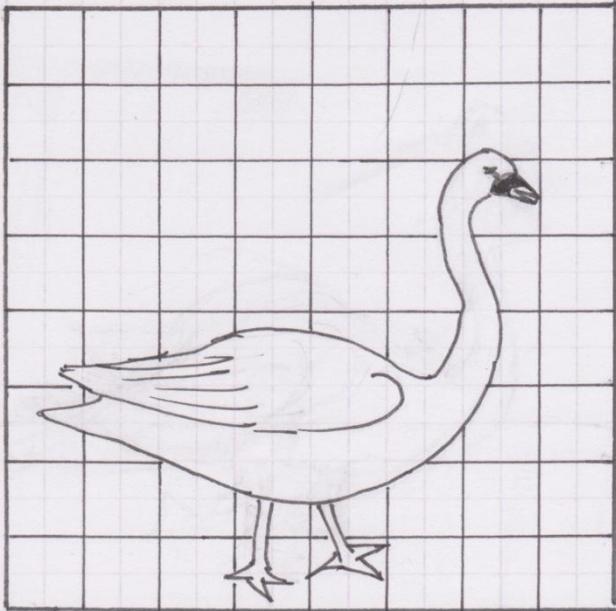

# CORMORAN

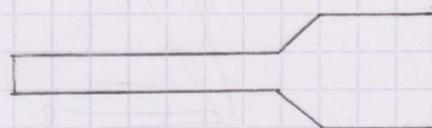

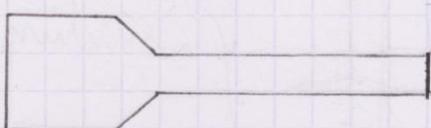

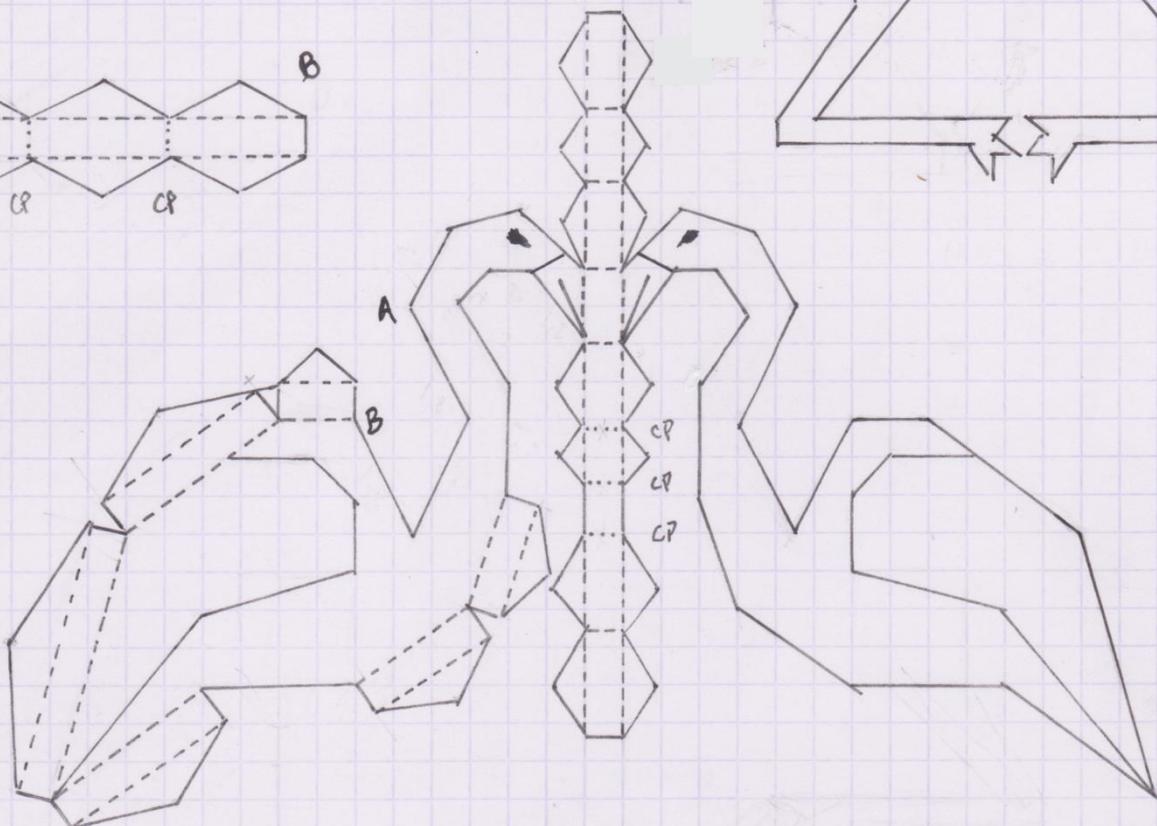

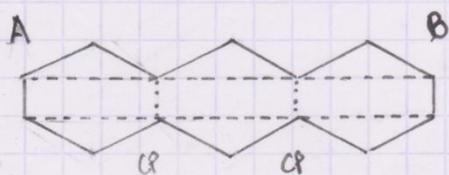

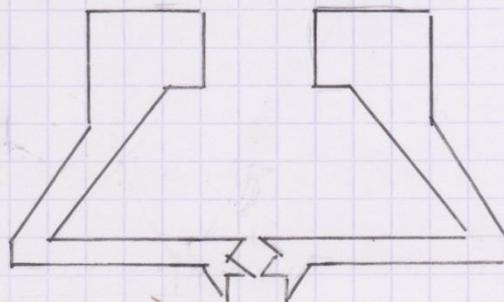

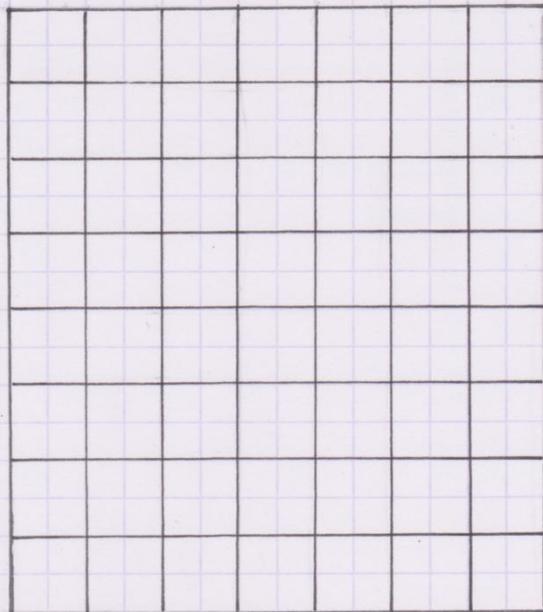

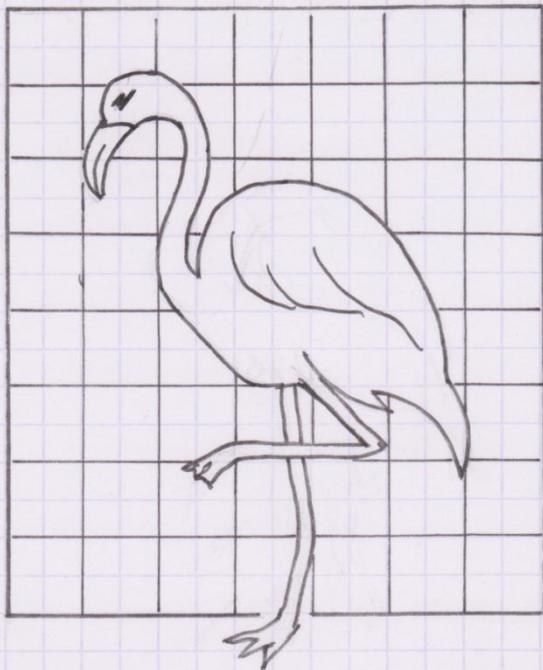

# CYGNE

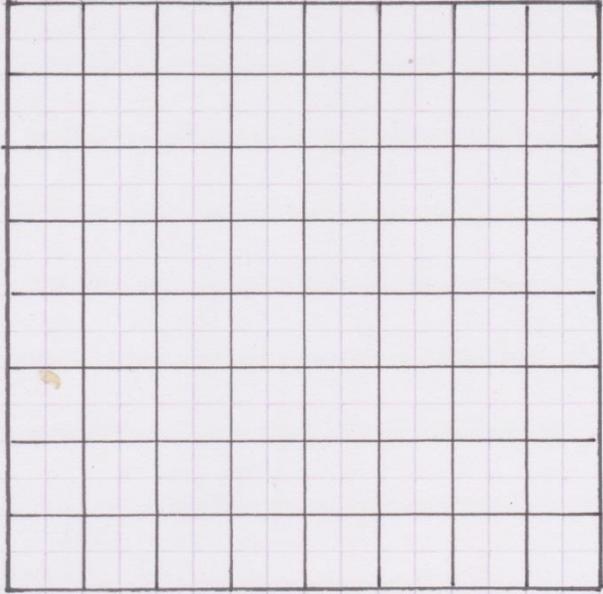

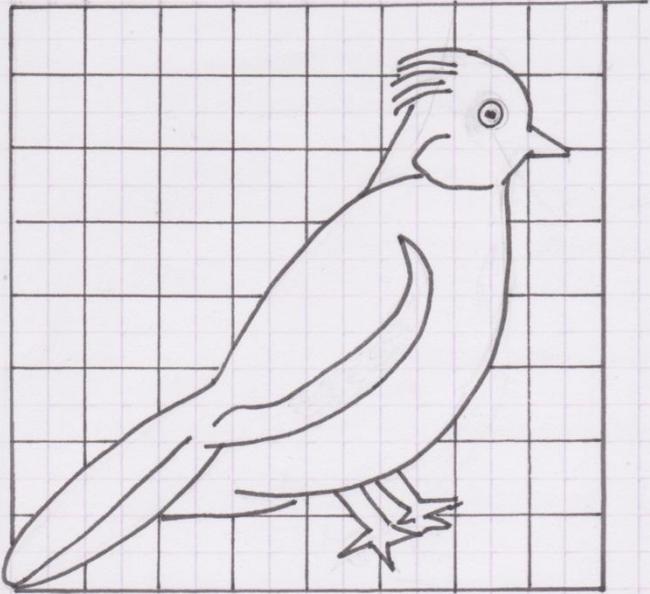

# FLAMANT ROSE

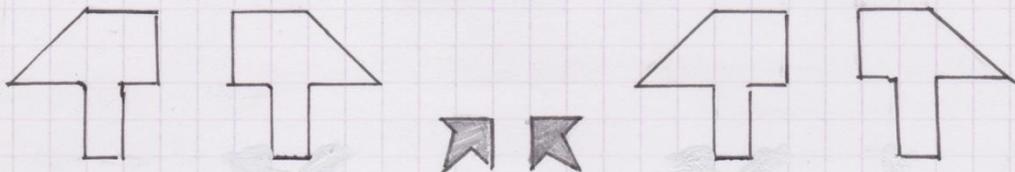

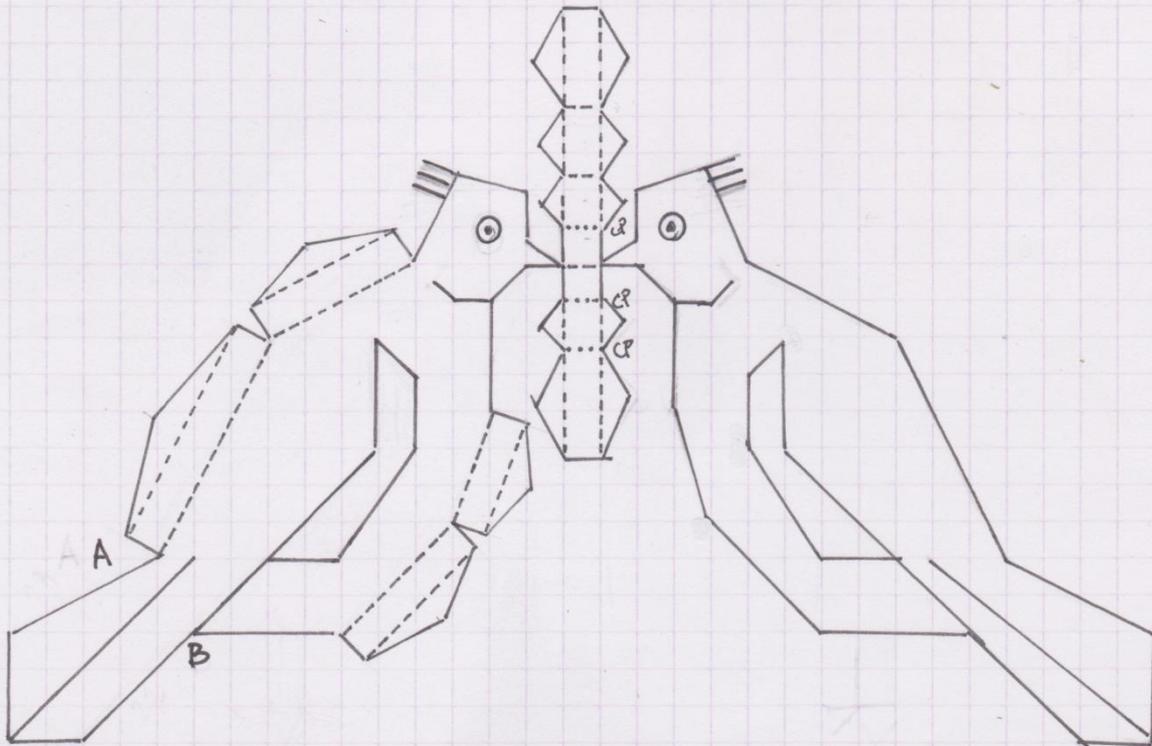

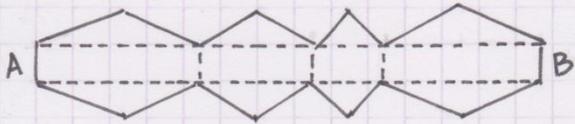

# GEAI

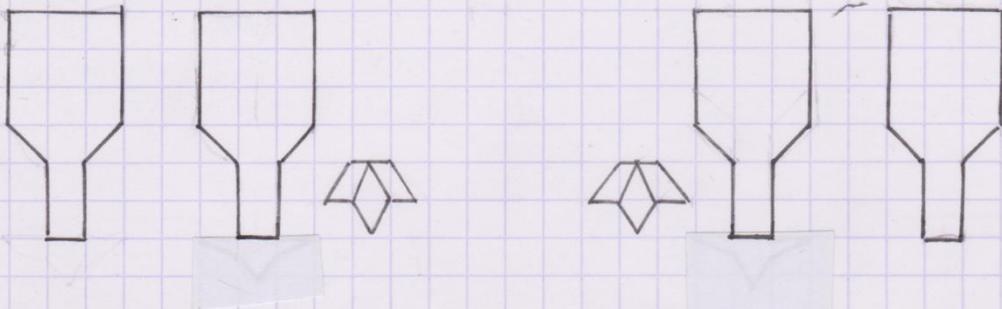

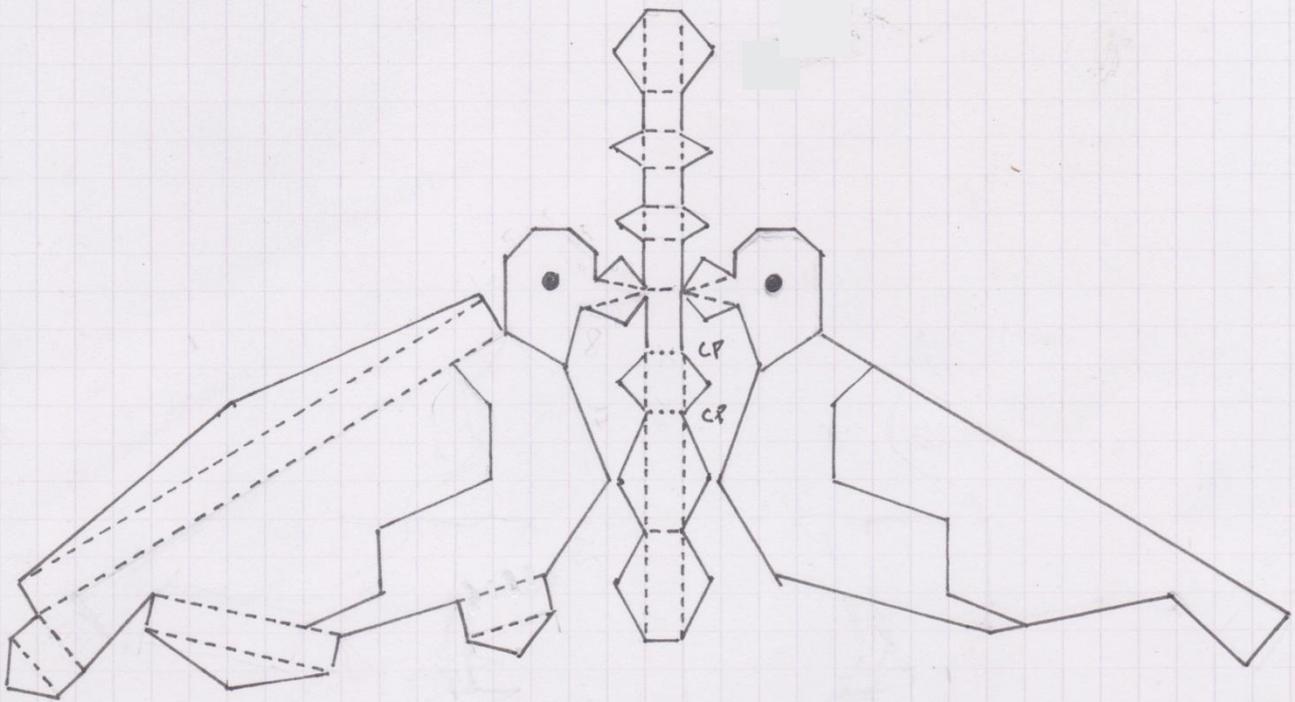

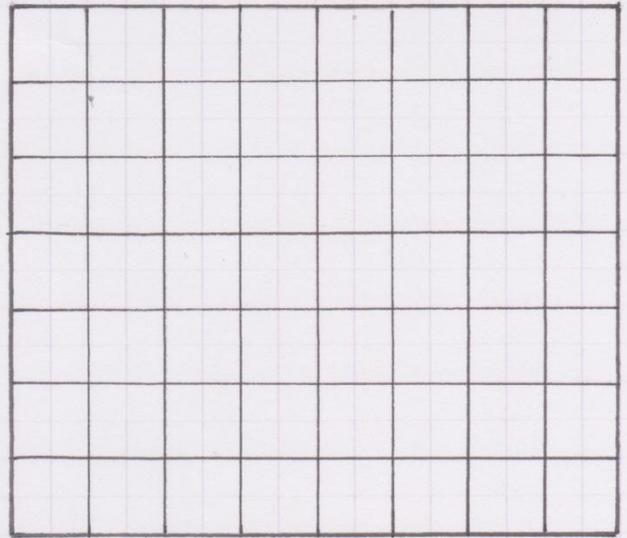

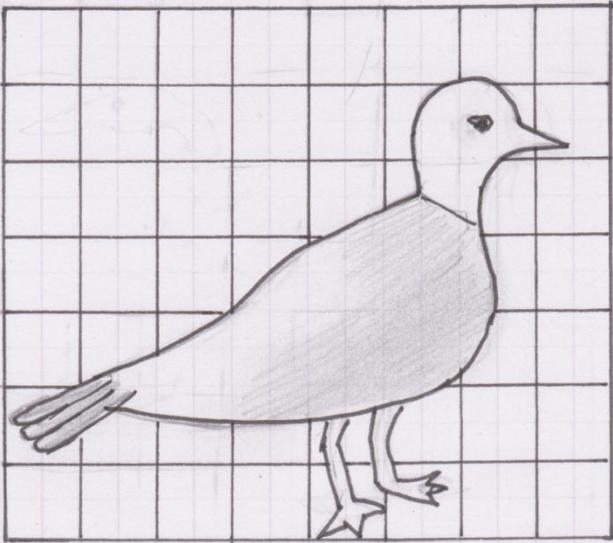

214

1,50 de quadrat et plus

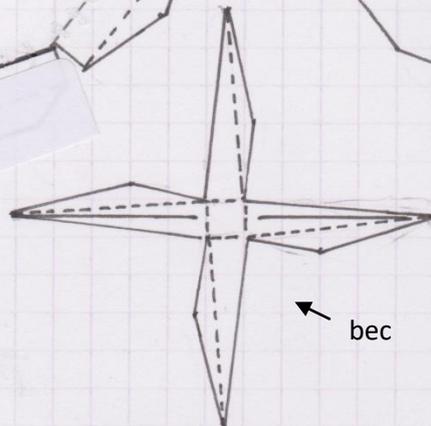

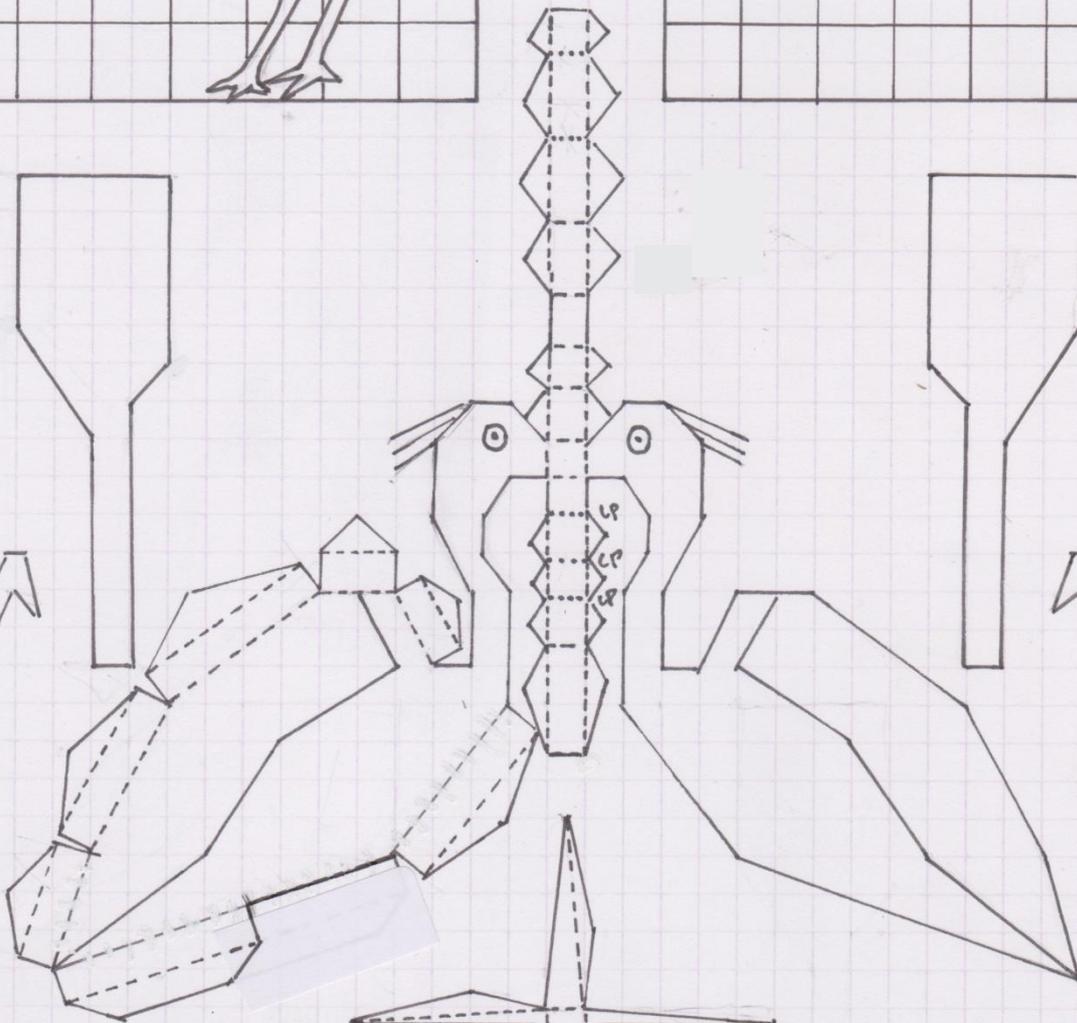

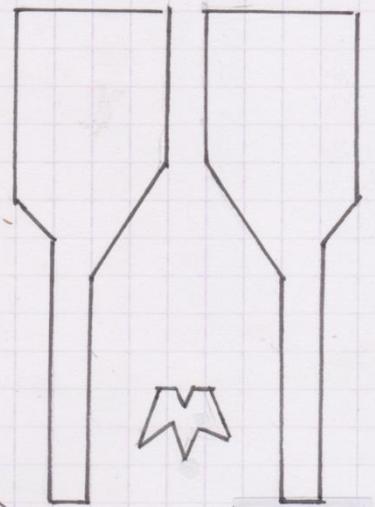

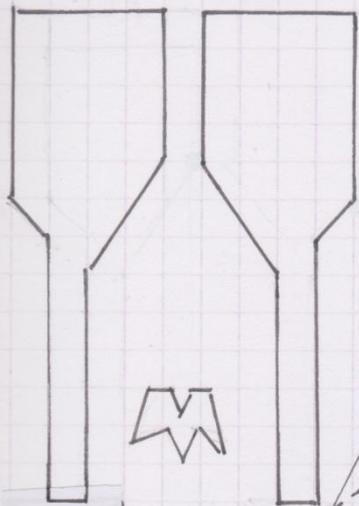

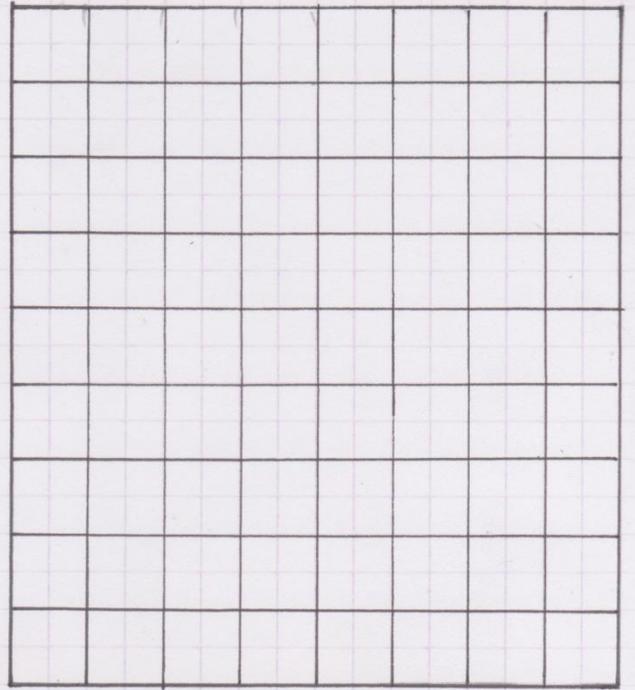

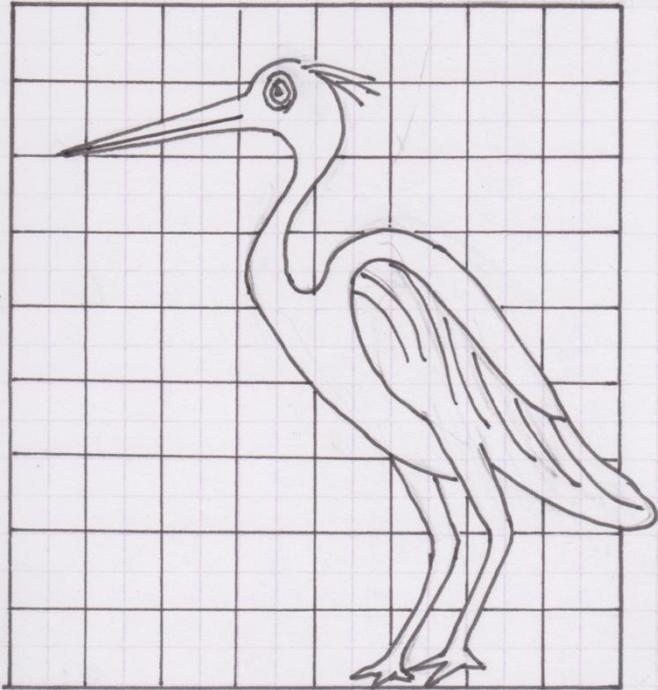

# GOÉLAND

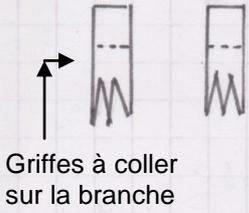

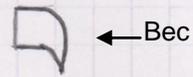

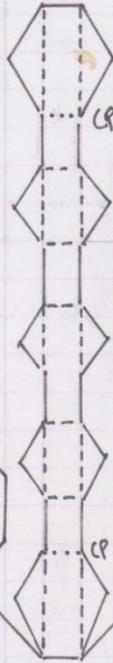

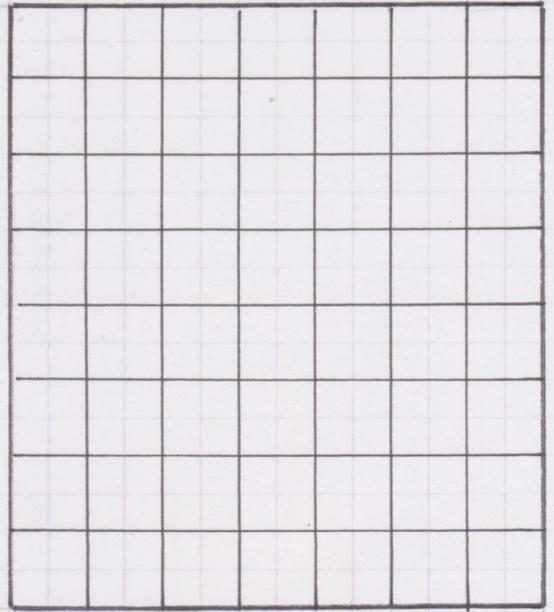

# HÉRON CENDRÉ

# HIBOU

Fente à couper pour introduire le bec

Vue en coupe

Corps du hibou

Percer les trous avant de coller

Branche en polystyrène

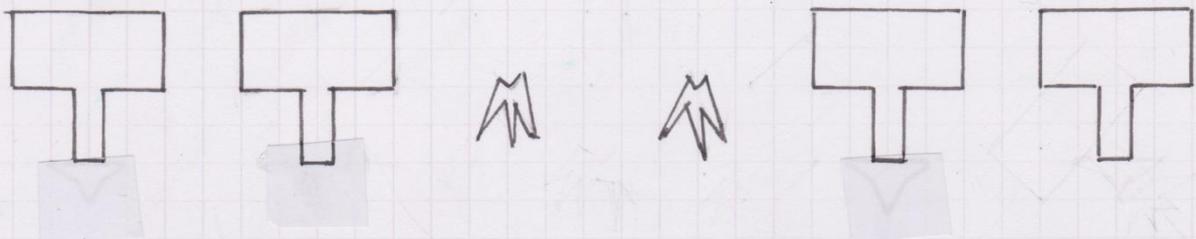

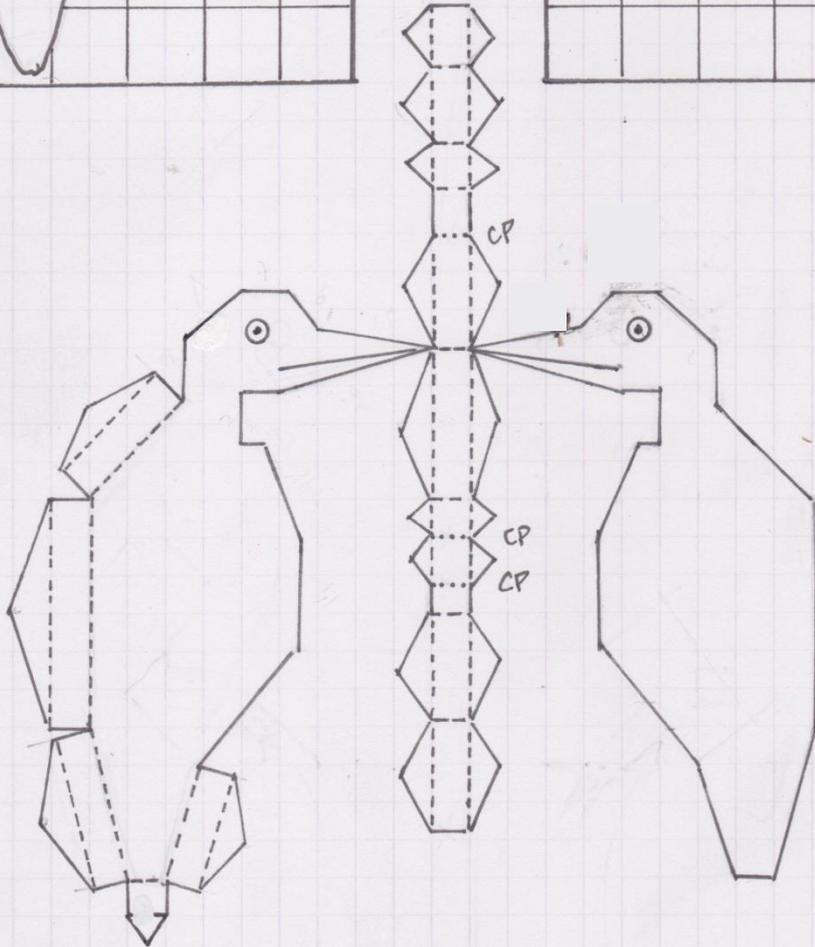

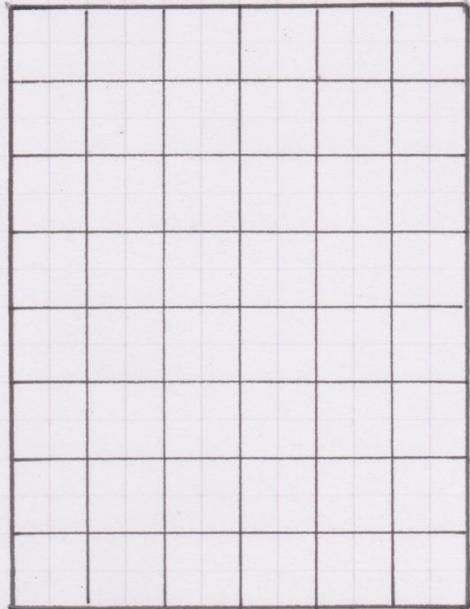

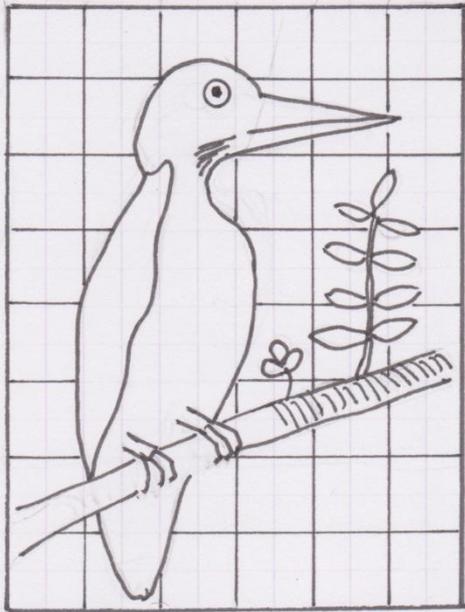

Cure-dents

Le corps du hibou et la « branche » sont maintenus contre le socle grâce à 2 cure-dents

Socle vertical en polystyrène 3x2 cm
